How do I use the game roster manager?

The game roster manager is where you can setup the game roster for players/parents to view on the website. However, keep in mind that changes made here do not affect the actual team roster. Navigate to communication->website->game roster manager.

A screenshot of a web interface titled "Choose a Team". It features a vertical list of six buttons: "Roster Team 1", "Athletics", "Test Team 1", "Braves", "Yankees", and "Add a Team". Below this list is a large, light gray button labeled "Choose a Team".

You will see a list of teams here. You can create or select an existing team by choosing add a team.

A screenshot of a dialog box titled "Add A Team". It contains the following elements: a "Team Name:" label followed by a text input field; a "Team Abbr:" label followed by a text input field; the text "-- OR --" centered below the input fields; a "Select Existing:" label followed by a dropdown menu showing "--SELECT--"; and an "Add" button at the bottom.

The players listed on the team page will auto-populate with players if it is an existing team with players on it.

Add a PlayerDisplay: ON OFFPrint QR

You can add a player by clicking add a player. You can choose an existing player or create a new player.

Add Player ✕

Existing Player

-- OR --

New Player

The print qr button allows you to print a qr code that can be scanned to take players and parents to view the roster you setup.
