Is there a way to place a player on multiple teams?

You can place players in another division by creating a new registration with their player id. Go to registration->registration edit and type in the player id in the id field shown below and click the save icon.

The screenshot shows the 'Registration Edit' form. At the top, there are navigation buttons: 'Prev', 'Lookup', 'Go', and 'Next'. The title is 'Registration Edit' and the season is 'Spring 2014'. The form is divided into several sections:

- Registration:** Includes fields for 'Returning Player', 'Reg. Status' (set to 'Withdrawn'), 'Affiliation', 'Division' (set to 'None'), 'Club', 'Coach Prospect', 'Age', and 'Grade'. There is also a 'Comments' field.
- Player:** Includes 'No Photo', 'DOB', 'Gender' (set to 'Unset'), 'Phone #1', 'Phone #2', 'Cell Phone', 'Email', and 'Email 2'. A red arrow points to the 'ID' field.
- Parent 1:** Includes 'No Photo', 'Email', 'Work Email', 'Phone #1', 'Phone #2', and 'Cell Phone'.
- Parent 2:** Includes 'No Photo', 'Email', 'Work Email', 'Phone #1', 'Phone #2', and 'Cell Phone'.
- Custom Fields:** Includes checkboxes for 'Need Jersey', 'Team Sponsor', 'Test2', 'Trap', 'Skate', and 'Competitive Clays'. There is a notice: 'Notice: Undefined variable: customFieldIsNameLabelFull in /report/WWW/ma_manageyourleague.com/LMS-'.
- Billing Information:** Empty section.
- Payment Information:** Empty section.

This will create a new registration record where you can set the division and team you want them to play in under the registration section. Also, make sure the reg. status field is set to registered. Click the save icon when finished.

Unique solution ID: #1099
