

Admin Site

How do I enable/disable coach/parent logins on the public site?

When parents/players/coaches create login information during registration, they can use it to log into the public website. You can disable this access by going to setup->organization->league and under the league tab, checking the "Disable Coach/Parent Login" field.

The screenshot shows the 'Manage Your League' admin interface. At the top, there are tabs: 'League', 'Contact', 'Admin', 'CC/Insurance', and 'Interface'. The 'League' tab is selected and highlighted with a red arrow. Below the tabs, there is a form with various fields. The 'Disable Coach/Parent Login' checkbox is checked and highlighted with a red arrow. Other fields include 'League Name', 'Sport Name', 'League Description', 'League Name Abbreviation', 'League Affiliation Link', 'League Child Abbreviation', 'Google Analytics Tracking ID', 'Sport Folder', 'League ID', 'Company ID', 'League Type', 'League Format', 'Multi-League Site Login', 'Disable Coach Functions', and 'Disable Standings (ctrl-click to select multiple)'. The 'League Type' dropdown is set to 'Child' and the 'League Format' dropdown is set to 'Recreation'. The 'Multi-League Site Login' checkbox is checked. The 'Disable Coach Functions' checkbox is unchecked. The 'Disable Standings' dropdown is set to 'Rookies 1'.
