Admin Site

Can I import players and how do I assign players to teams?

Players can be imported to teams using our roster import tool. You get there by navigating to registration->import roster. Attached is a template file that you can fill out with the player information and then upload it to the site. It is ok if some of the field are left blank, but vital information, such as name and age must be filled in.

After players are uploaded into the system, then you can use the autodraft tool to assign them to teams using the auto. draft tool. Navigate to setup->teams->auto. draft tool and choose the settings that you desire for your draft and click assign players.

Automated Team Assignment

This tool will automatically assign players to teams, or delete all team assignments for a level.

League Evaluations Used:	Manage Your League ▾
Season Evaluations Used:	Dont Forget Where 2015 ▾
Level:	--Select a Level-- ▾
Assign head coach's players to the teams they coach:	● Yes ○ No
Assign other coach's (and Team Reps) players to the teams they coach:	● Yes ○ No
Assign average OA to unrated players:	○ Yes ● No
If selected No above, assign this value (0 for default):	0
Assign siblings to the same team:	● Yes ○ No
