

## How do I create a link to a custom event sign-up page?

From the admin panel, navigate to schedule/games->utilities->event management. There will be a list of events. Click “edit” next to an event, and it will bring up a page where you can view and edit the event details. In the field labeled “Signup Link”, you will find the URL for the event sign-Up. Use this URL to link to the event sign-up page.
