How do I use the practice report tool?

You can view a report on practices by navigating to scheduling/games->schedule/game reports->practice report.

| | | | |
|--|---|---------------|---|
| Level | <input type="text" value="All Levels"/> | Team | <input type="text" value="All Teams"/> |
| Start Date | <input type="text" value="2012-12-03"/> | Resource | <input type="text" value="All Resources"/> |
| End Date | <input type="text" value="2016-12-03"/> | Sort By | <input type="text" value="Date ASCENDING"/> |
| Headers | <input type="radio"/> Level <input type="radio"/> Team <input checked="" type="radio"/> Off | Limit Cells | <input checked="" type="radio"/> On <input type="radio"/> Off |
| Weekday | <input type="radio"/> On <input checked="" type="radio"/> Off | Show End Time | <input checked="" type="radio"/> On <input type="radio"/> Off |
| <input type="button" value="Generate Report"/> | | | |

You can build the report according to level, date range, team, and resource. You can sort and format the table using the option fields.
