How do blackouts work?

Blackouts allow you to set dates that games/volunteers cannot be scheduled on a resource. Navigate to setup->scheduling->blackout and you will see the screen

[Add Blackout](#)

Testt	All	All	4/1/2010	1:00 AM - 11:00 PM	Edit	Delete

You can give the blackout a name. You can set the start and end dates and limit it by a certain day of the week. It also allows you to select any particular resource, level, team, or schedule type that you would like the blackout to affect. After you have added the blackout date, you can edit it at any time by clicking the edit icon next to the blackout name.
