

Registration

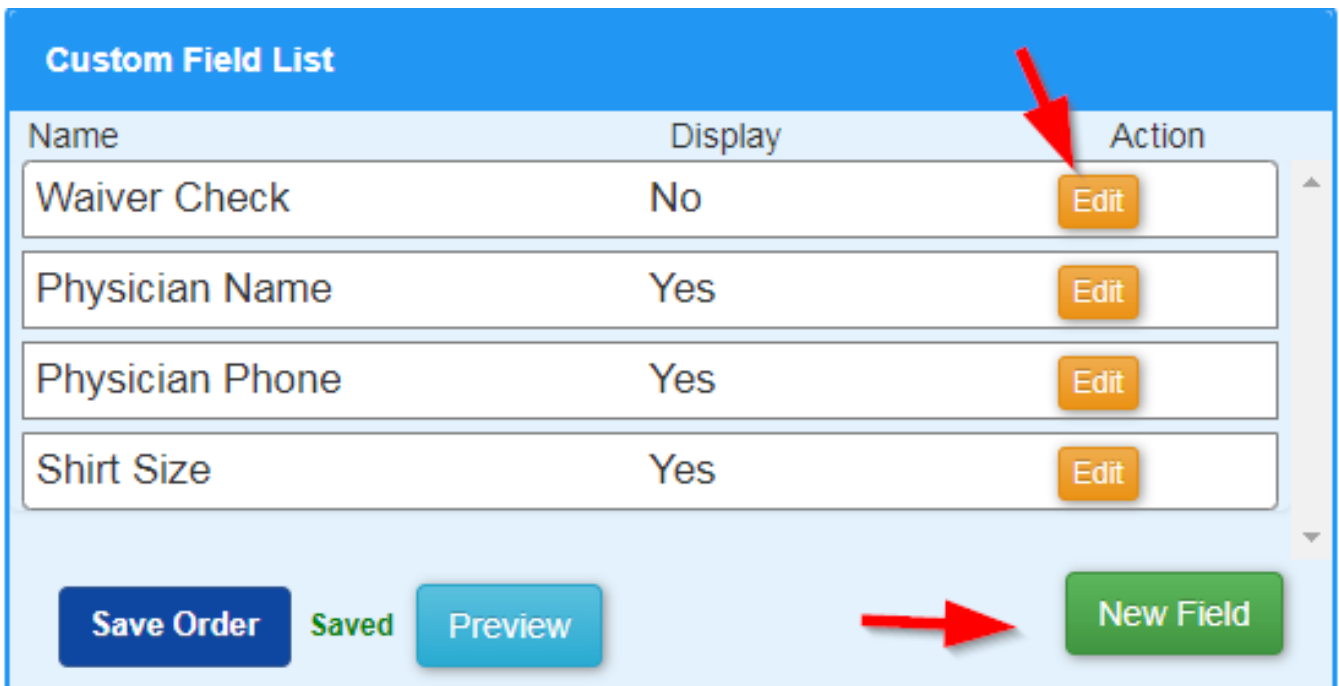

How do I add/edit/remove input fields in registration?

Fields such as the ones pictured below (e.g. shirt size, primary position, doctor, doctor's phone number, etc.) are known as **custom fields**.

The screenshot shows a blue registration form titled "Additional Info". It contains three input fields: "Physician Name" (a text box), "Physician Phone" (a text box), and "Shirt Size" (a dropdown menu).

You can edit custom fields on the admin site by navigating to Setup->Registration->Registration Setup Wizard. You can add fields to either the parent page step or the player step. Choose which role you would like to add the field to, click the "New Field" button, and fill out the fields in the window.

The screenshot shows a table titled "Custom Field List" with the following data:

Name	Display	Action
Waiver Check	No	Edit
Physician Name	Yes	Edit
Physician Phone	Yes	Edit
Shirt Size	Yes	Edit

Below the table are buttons for "Save Order", "Saved", "Preview", and "New Field". A red arrow points to the "New Field" button.
