

Registration

How do I create a page that only certain players have access to when registering?

Navigate to setup->registration->registration setup wizard, go to the custom page setup tab and select new step. Choose a name and select the desired settings for the page. Go into edit restrictions and you will be able to determine who gets to view this page when registering. Then you can save step options and that will take you to where you can create the questions that you wish to have on that page.

The screenshot displays the 'Registration Setup Wizard' interface. The main window is titled 'Registration Setup Wizard' and contains a list of setup steps: Basic Registration Look, Intro Setup, Welcome Setup, Parent Page Setup, Player Page Setup, Custom Page Setup, and Payment Step Setup. The 'Custom Page Setup' step is selected and expanded, showing a table of custom steps. A 'Restrictions' dialog box is open over the table, allowing the user to configure access settings for a selected step. The dialog box includes a 'Select Type' dropdown, an 'Ok' button, and a 'Save Step Options' button. The main window also features 'Prev' and 'Next' navigation buttons at the bottom.

Name	Display
Conflicts	No
Coach Volunteer	No
Clarence Fee	No
Volunteer	No

Restrictions dialog box options:

- Select Type: [Dropdown]
- Access: All [Dropdown]
- Skip for Admins:
- Buttons: Edit Restrictions, Save Step Options
