

## Public Site

### Where do I change how the schedule module displays game?

You can do this by going to communication->web site->module setup. Under the schedule tab, select the time range you would like to display. You can also choose whether to display the schedule as a list or on a calendar.

The screenshot shows a web interface for configuring the 'Schedule' module. It features two dropdown menus: 'Time Range of Schedule' (currently set to 'Current Date') and 'Display Format' (currently set to 'List'). A 'Save Schedule Config' button with a checkmark is located on the right. Three red arrows are overlaid on the image: one pointing to the 'Time Range of Schedule' dropdown, one pointing to the 'Display Format' dropdown, and one pointing to the 'Save Schedule Config' button.
