How do I find players not yet assigned to teams?

If you go to registration>registration list, you will see a list of all those registered for the league as well as the team they are on. If you click on sorting options and add team ascending to the sorting order, you will be able to see who is not listed on a team yet.

The screenshot shows a web interface for sorting options. On the left, under 'Sorting Options', there is a list of sorting criteria: Name Ascending, Name Decending, Reg ID Ascending, Reg ID Decending, Age Ascending, Age Decending (highlighted), Date of Birth Ascending, Date of Birth Decending, Parent Name Ascending, Parent Name Decending, Level Ascending, Level Decending, SubLevel Ascending, SubLevel Decending, Team Decending, and School Ascending. On the right, under 'Current Sort Order (default by Last Name)', there is a dropdown menu showing 'Team Ascending'. Below these lists are four buttons: 'Add to sorting order >>', '<< Remove Option', 'Up', and 'Down'. At the bottom left is a 'Submit' button. Red arrows indicate the sequence of actions: clicking 'Age Decending', then 'Add to sorting order >>', then 'Team Ascending' in the dropdown, then 'Add to sorting order >>' again, and finally 'Submit'.

An alternative method would be to navigate to setup>teams>draft tool and go through each level to see who hasn't been assigned to a team yet, they will be listed at the bottom.
