

Registration

How do I make the parent's city, state, and zip code auto-fill to my league's city, state, and zip code during registration?

Navigate to Setup->Registration->Registration Setup and click the "Parent" tab. Here you will find three separate fields to automatically fill city, automatically fill state, and automatically fill zip.

If you have "Yes" selected, then the corresponding field will automatically fill during the parent step of registration.

Registration

The city, state, and zip that will get filled in are pulled from the league contact information ([see FAQ entry](#)).
